

BAGEL DIVIDER/FORMER

Model:GBD-S180 / GBM-D-1

Operating Features

Our Automatic Bagel Machine can be easily adapted for the production of mini, regular and bull sized bagels. The Single line GBD-S180 Bagel Divider has an output of 7000 pieces per hour. The Bagel Former is designed to work in conjunction with the divider, but may be fed manually. The Divider has a scaling range of 1oz. to 9oz. and may be used independently to divide many types and textures of dough.

Features

- Units mounted on casters.
- No oiling necessary.
- 4' Infeed Conveyor allows for a large quantity of dough to be used.
- Machine could be linked to a molder or a rounder.
- Knives are teflon coated.
- Easily adjusted pressure plate.
- Rotary knife cutting action-no piston or messy oil cleanup
- 20" turntable or side conveyor for easy accessibility and panning.

Table 1: Technical Specifications

Machine Model No.	Dimensions			Voltage V/Ph/Hz	Amperage Amps	Weight lbs / Kg
	Length	Width	Height			
GBD-S180	72" / 183 cm	34" / 86 cm	54" / 137 cm	220, 380/3Ph/60Hz	15	1000 / 455
GBM-D-1	82" / 208 cm	30" / 775 cm	48" / 122 cm	220, 380/3Ph/60Hz	6.3	700 / 318
